Our partners and sponsors
Transport Security Expo (TRS) is now in its 12th year of providing an unrivalled educational and networking event for the global transport security industry.

While each of those dozen years in operation has had their defining incidents in the news, 2014 has been a particularly difficult one for aviation with the two tragic disasters involving Malaysian Airlines. In April this year Malaysia Airlines Flight 370 from Kuala Lumpur to Beijing went missing over the South China Sea, sparking a hunt for the missing plane that is still to provide any answers as to the fate of the flight.

Just a few months later in July, Malaysia Airlines Flight MH17 from Amsterdam to Kuala Lumpur was tragically shot down over the Ukraine as it entered airspace around continued fighting between the Ukraine army and Russian separatists. This last incident bringing into sharp focus the dangers of flying over or near conflict areas.

With the support of ADS and an expansion to our conferencing programming to keep pace with the evolving industry, this year’s TRS Expo will continue to provide the largest and most credible major event in the global transport security industry.

In 2014 we are also delighted to welcome support from ADS – the premier trade organisation for the UK Aerospace, Defence, Security and Space industries.

With the support of ADS and an expansion to our conferencing programming to keep pace with the evolving industry, this year’s TRS Expo will continue to provide the largest and most credible major event in the global transport security industry.

NEW FOR 2014 - SECURE TRANSPORTATION

The Secure Transportation Conference, in partnership with Brinks, is new to Transport Security Expo for 2014. It will cover security and protection of high value assets (including cash, valuables and cultural objects), hazardous materials transport (including radioactive, hazardous and toxic materials), protection and security for high-net-worth individuals and VIPs, and vulnerability mitigation best practice for all strands of secure transportation. The conference will discuss risk and threat assessments, safety and security solutions, strategies for the prevention of criminal or terrorist acts and technology innovation together with best practice case studies.

Advisory Board Members

TRS has carefully selected twelve leading experts covering all areas of the security industry to form its high-level strategic Advisory Board. The Board’s role is to provide advice and direction to ensure that Transport Security Expo has all the bases covered in terms of content relevant to all sectors within the transport security market.
